# Moving Industries Forward

We started designing and delivering autonomous mobile robotics applications that solved complex material handling needs in the semicon and healthcare industry in 2017.

The experience gained from small and large fleet deployments in cleanroom and hospital environment led SESTO to sharpen its focus to develop and deliver AMR solutions for applications such as meals delivery in hospitals and nursing homes and material handling robots for manufacturing and warehouse facilities.

Today we are a leader in the AMR solutions for multiple customers who utilise our robots daily to automate their material flows.

# Our Products

## Magnus AMRs

One base, Multiple applications.

### Three payload options

Magnus M200, M300 and M400 support compact shelves to long and heavy carts

Scan here to explore Magnus AMRs

## Magnus Lifters

300 - 1000 kg lift for trolleys, cages, and shelves

### Built for lifting tasks

M300-M1000 series lifters handle 300/400/500/1000 kg payloads with precise, stable lift control.

Scan here to explore Magnus Lifters

## Magnus Forklift

1000 - 1500 kg payloads for pallet pickup

### Three payload options

M1000PT, M1400S & M1500PT, built to handle different loads.

Scan here to explore Magnus Forklift

## Magnus Applications

Designed for real-world operations

### Engineered for real operations

Magnus applications are built around your workflow, from Prime 2's mobile manipulation to Medibot's hospital logistics

Scan here to explore Magnus Applications

# Why Choose Us?

## Solutions Focused

We deliver AMR solutions that meet customers' requirements. From simple AMR applications to complex AMR applications integrated to MES/WMS and equipment and tools

## Customizable to Your Flow

Flexible hardware and software built to integrate seamlessly into your existing operations

## Full Range of Products

From compact movers to heavy-duty lifters, SESTO covers every payload and application need

## Design & Engineering Expertise

Our in-house team understands your process end-to-end by ensuring each solution is optimized for performance

## MagFleet Software

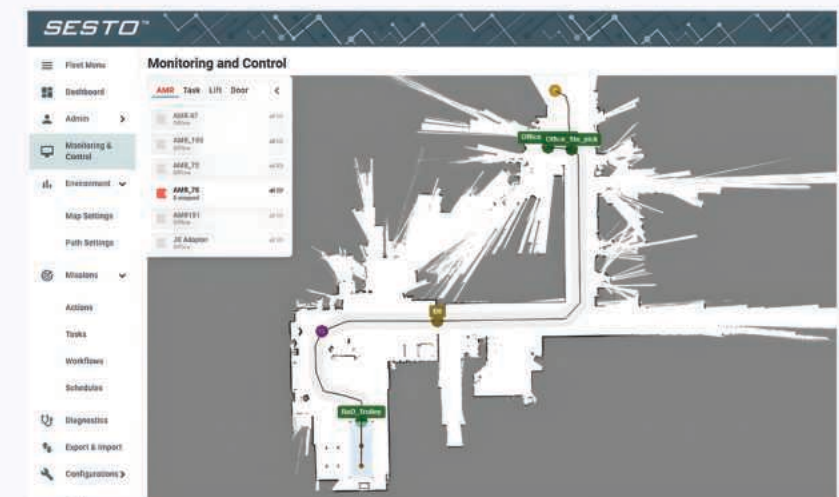

Keeping operations moving in sync

### Synchronises routes and tasks

MagFleet synchronises routes, tasks, and traffic across multiple robots to keep operations moving
